VILLAGE OF GOSHEN, NEW YORK:

ZONING BOARD OF APPEALS

-----x

In The Matter Of:

JEFFREY SHERWIN, Applicant
To Consider an Appeal from the
Village Building Inspector's Determination
Affecting Premises Section 104, Block 1, Lot 2.

October 17, 2013 276 Main Street Goshen, New York 7:30 p.m.

BEFORE:

WAYNE STAHLMANN, Chairman
NEIL FRISHBERG
JOHN STROBL
GAR CLARK
STEPHEN J. GABA, ESQ.

ALSO PRESENT:

JAMES G. SWEENEY, ESQ.

JEFFREY D. SHERWIN, ESQ.

GREGORY G. HOOVER, ESQ.

MR. STAHLMANN: Welcome everybody. We have one matter on the agenda tonight. As you can see, we have a stenographer here tonight, so, what I am going to ask for everybody's cooperation on is when you stand up to make a comment tell us who you are, tell us what your address is so we know where you live and if the stenographer waves to me I am going to say slow down so we can make sure we get everything properly on the record.

So, on the agenda is Applicant, Jeffrey Sherwin, who requested an annulment of the building inspector's issuance of a building permit to allow for the construction of a single-family dwelling at premises located at 14 McNally Street on the grounds that the said permit allegedly violates Village Law 7-736. Premise affected - 14 McNally Street, Goshen, New York. Applicant has the floor.

MR. SWEENEY: Thank you. For the record, my name is James Sweeney. I am an attorney here in Goshen. I am here on behalf of the Applicant, really the Appellant in this matter, Jeffrey Sherwin, but I want to let the Board know that I really represent all of the folks along Murray Avenue and Jeff happened to be the name that signed

the appeal and it precedes in his name but all of the folks on Murray Avenue and that area are my clients. And in the receipts of mailing - there were thirteen mailings made, thirteen green cards received back, so, we have 100 percent in that respect.

Let me next hand up some exhibits that I will refer to from time to time and I guess I will hand them to the Chairman. The first one is the decision of the Supreme Court back in 2000 that leads us to tonight's in decision of Judge Lang in the matter of Cohen against the Village of Goshen and I have labeled that as Appellant's Exhibit 1. The second document I am handing to the Chairman is the Deed from the Board of Education to the Village of Goshen for the strip of land that is the subject matter of tonight's proceedings and it is a Deed dated May 20th, 1970 and I have labeled that as Appellant's Exhibit No. 2. And the third document I am going to be handing up and referring to is a Deed from Tradewind Builders & Developers Inc. to C.H. Development Inc. for the parcel of land which is the subject of tonight's proceedings as well and I have labeled that as Appellant's Exhibit 3.

- PROCEEDINGS -

The third document I will be handing in is a reduced version of the site plan and survey that supports the building permit that is the subject of tonight's proceedings with certain color coding that will help you identify what this really says. The parcel that is outlined in yellow is the C.H. Development Inc. Parcel, the parcel that is outlined in black is the Village of Goshen's parcel and the strip labeled in red is the McNally or the so-called McNally Street, right-of-way or bed of the so-called McNally Street. I have also added one other item onto this which is the approximate location of the "Do Not Enter" sign at the intersection of the school parking lot and McNally Street - as they say so-called McNally Street. So, I will hand that in and I labeled that as Exhibit 4, we will be talking about that from time to time.

I think the best thing to do and start is to tell you how we got here. First, let's go back to 2000 and the document that I've handed up is the Exhibit No. 1 and that is a decision from the Supreme Court that annulled the Village Board's decision of a year or two before that which declared McNally Street or New McNally Street a

3

- PROCEEDINGS -

village street and a one-way village street by the way, a one-way inbound village street they had declared that, and Judge Lang of the Supreme Court after hearing arguments and considering a great deal of evidence decided that the Village had not gone through the proper procedures to affect a village street, it had not adopted a resolution and held a public hearing and received public input on the matter of whether the strip in question - which I call New McNally Street - was laid out as a village street in accordance with the dictates of the New York State Village Law and the matter was decided at that point and it came to rest at that point. There was an appeal taken but it was not, as we say, perfected and it died out, so, Judge Lang's decision stood and it stood for ten years.

Then it was brought to my attention through Mr. Sherwin that the Building Inspector, Ted, had issued a building permit for the lot in question and that's the lot that is outlined in yellow on that diagram that I handed you, the C.H.

Development lot had issued a building permit for one home on that lot with access onto the New McNally Street. I contacted the Building

25

Inspector, both verbally and by letter, indicated to him I didn't think that was a proper building permit because of Judge Lang's earlier decision declaring McNally Street not to be a village street and as you may assume or I presume or know, no building permit can be issued for any structure, home or commercial structure, unless the lot has frontage on either a municipally maintained street - a village street in this case - or a street that appears on a filed map that has been improved to Village standards. I said to Ted Lewis that that's not the case here, neither situation is the case because of the strip of land we are talking about has been declared not to be a village street. asked him to rescind the building permit, Ted did not do that, so, I was forced to take this appeal to you before I proceeded anywhere towards the Court, required by certain rules and regulations to proceed through your Board before there's any litigation and that's a good rule, clears away an awful lot of things and avoids litigation.

So, that's what happened. I took the appeal to this Board and I based it basically on just what I said - it is not a village street. You can't

issue a building permit and it does not support a building permit. Then we got to the point where the Building Inspector issued a letter explaining himself in further detail and that's the letter of October 2nd - that is somewhere in your materials and Ted Lewis took a different approach, or I should say an alternative approach to why he thought the New McNally Street supported the building permit that he had issued and he referred to and relied upon a section of the Village Law known as Streets by Prescription, it is Village Law 6-626 and it is a very short statute and it is one that has been around forever. I might as well read it to you, it is only about fifty words and is easy enough to read. It says, "All lands within the Village which have been used by the public as a street for ten years or more continuously shall be a street with the same force and effect as if it had been duly laid out and recorded as such." The Building Inspector took the position that since Judge Lang's decision in 2000 the Village forces had maintained McNally Street, New McNally Street, and had actually improved it and put a sidewalk there, had paved it from time to time, snowplowed

- PROCEEDINGS -

it, so forth and so on, and he felt at that point it had - and had done so for ten years since Judge Lang's decision - he felt in view of that the street had automatically become a village street and there was no need to precede back to the process of having a resolution subject to public hearing and public input, that it was automatically a village street and supported the issuance of the building permit.

Well, that is how we got here tonight. I issued to you - and I don't know if you had the time to read it - a rather comprehensive position statement dated October 16th which outlines the positions that I am going to try to articulate to you tonight in a very simple fashion. I think the Building Inspector it wrong for several reasons.

First of all, and most important, streets by prescription refers to an old ancient rule, one that stems back to Roman Law and it has to do with the use of another's property in a way that is adverse or hostile to that owner's ownership rights. If you use somebody's property for a long period of time, whatever the law prescribes - and here it is ten years - and there is no objection

- PROCEEDINGS -

from the real owner, the law sets up an automatic defense to any claim that you still own it. In fact, the person who has been using it owns it and has the rights to continue to use it as if he owned it. As I said, that goes back to Roman law, it is an ancient idea and has a lot to do with adverse possession over Squatters Rights - as lots of people call it - and the prescription is ten years. It is prescribed, that is where the word comes from, scribed, scribed in the law, ten years, you do it for ten years continually the property is effectively yours because that law sets up a defense, nobody can say otherwise.

So, seems simple enough, but the law hasn't imbued in it two very important characteristics that are not in the naked language of the Statute I just read to you. First, one of them is very obvious - you cannot gain an adverse right over a piece of property you own. There's no such thing as a hostility against yourself. If you own the property you can use it any way you want, you have to use it according to all zoning laws and things of that nature but it is your property and you can't act hostile to your own interests. So, there

- PROCEEDINGS -

is no sense of adversity, no sense of hostility when the claim is 'I've used it for ten years; therefore, I have a prescriptive right', it just does not make sense, it is an oxymoron, it does not fit.

The second part of the rule is more important I think. It requires when we are talking about streets, not just somebody taking adverse possession of another person's property, but streets and ways and public means of transportation. It requires a continuous use by the public, by the public at large, and that means more than the use by abutting owners, and as you know this street, McNally Street, New McNally Street, is used by the school district who is an abutting owner, it is used by their staff, their teachers, their students, so forth and so on. It is also used by one owner who has a driveway - I think the name is Farley - has a driveway in the front-end of it. They are abutting owners.

MR. STAHLMANN: Can I interrupt you for a second?

MR. SWEENEY: You may.

MR. STAHLMANN: When I coach Little League at

- PROCEEDINGS -

6:00 at night and I have practice behind GIS, how do I get there? I go up McNally Street. I am a member of the general public. At the time I didn't have any kids in GIS, I am not staff, I am not an employee of the system but I use that street regularly.

MR. SWEENEY: You are the general public?

MR. STAHLMANN: Yeah.

MR. SWEENEY: Well, here's the rule as it is explained, and I will read from a case that I think is a pretty good case and it is a case that really decided to stay in Maine but it is the same rule in New York and it is a good one - "Evidence of the use of the road by abutting land owners is insufficient to establish the existence of a public prescriptive easement because their travel does not constitute use by the people who are not separate from the public generally." What I am trying to say by that is the public does not have the right to move through that street and go through the parking lot of the school, they have no right to do that. They may do it but they have no right.

MR. STAHLMANN: So, am I trespassing when I do that?

MR. SWEENEY: I think you are but I am not going to go any further than that.

MR. STAHLMANN: On a Saturday afternoon when I pass through the school?

MR. SWEENEY: I think you are unless you have the right to cross over.

MR. STAHLMANN: Is the owner of the property who has the driveway on McNally - to my recollection has been there while I was on this Board thirteen years ago the first time we heard this and that driveway was there - is that person trespassing every morning when they go to work?

MR. SWEENEY: No.

MR. STAHLMANN: Why?

MR. SWEENEY: He is an abutting owner that has the right to use it but he's not the general public or the public at large.

MR. STAHLMANN: Well, if he is an abutting owner with the right to use it why is not this gentleman an abutting owner with the right to use the street?

MR. SWEENEY: He is, but that does not make it a public way, and I will get to the road he's not an abutting owner, that is a different issue. He's

25

not the general public, he's not the public at large, he's not the whole public, he's not indistinguishable from everyone else. That's the test that anybody and everybody can role through that street, but they can't.

MR. FRISHBERG: I am sorry - I have a case that I was looking up it is by the Court of Appeals maybe your research found it and it is called Marchand vs. New York State Department of Environmental Conservation, it was an action entitled from 2012 which is relatively recent and it quotes exactly what you said in 6-626, "All lands within the Village which have been used by the public as a street for ten years or more continuously shall be a street with the same force and effect as if it had been duly laid out and recorded as such." This happened to be an exert by title and it happened that the Court determined this particular street was not a public place but in doing that it sort of expels the rule from what I can tell and they said that, from what I can tell, is that there's two things that have to take place - First, the Village has to maintain the street; and two, it has to be used by the public.

25

So, it does not talk about adverse possession I mean, yes, it mentions prescriptive easement but I am aware a prescriptive easement you have to have an adverse possession. It seems to me your argument that it cannot be a prescriptive easement for the possession because the use isn't adverse, it is not supported by the statute or by the case, so, I am just baffled as to why, and then you say it is true with Maine but this Court of Appeals case seems to go against you.

MR. SWEENEY: I have cited some law in my rule and in my position statement that says just what I've said and it just does not make sense, you can't have hostility against yourself.

MR. FRISHBERG: You are right, but it says here, "As the Village acknowledges, the public use in that sense is not enough to satisfy the statute. we held more than a century ago, interpreting similar language in an earlier statute: 'The road must not only be traveled upon, but it must be kept in repair or taken in charge and adopted by the public authorities.'" Cited: Speir vs. Town of Utrecht, which is a 1890 case.

MR. SWEENEY: I don't have any problem with

that, Neil. Of course, that is part of the process of prescription, the municipality has to exercise dominion over the strip of land and that's what that case is talking about. But it also has to have a sense of hostility when you are talking about prescriptive use. The statute says streets by prescription, it does not say streets by continuous use, it says streets by prescription. What does prescription mean? Prescription means adverse and hostile use for ten years.

MR. FRISHBERG: But the narrative of statutory prescription, shouldn't you have to read something into the statute based upon the title?

MR. SWEENEY: No, I think you have to read the case as interpreted.

MR. FRISHBERG: Well, I only have one, one Court of Appeals case.

MR. SWEENEY: So, what I am telling you is that there is two prongs to the Building Inspector's theory of statutory prescription. The first is - there's no hostility, the Village owns it, can't be hostile to its own ownership; the second is - there's not a use by the whole public, not just a few members of the public and not just

abutting owners. Those two aspects have not been met, so, the Building Inspector's theory fails on that basis.

Now, there is another basis that is important and this I ask you to take a look at that diagram that I gave to you and maybe Ted has a full scale, I don't have a full scale of the piece that came with the building permit application. Do you have that with you?

MR. STAHLMANN: And if there's anyone out there that wants to see this I am going to put this out for you so you can follow along with us.

MR. SWEENEY: You will see -- and I have to come up here and point it out -- you will see on the diagram and the diagram that's being circulated is the C.H. Development property. It comes here, comes here, comes here, comes here and runs back along my client's property's backyard (indicating). You will see there is no actual frontage of the C.H. Development property upon McNally or New McNally Street. At this point in the northwest it is about a 40 foot separation gore - as we call it. At this point in the southeast it is about a 15 foot separation (indicating).

- PROCEEDINGS -

Now, the section of law that requires a street to support the issuance of a building permit requires that the parcel in question have actual frontage on the street, actual frontage, and the case law is pretty strong on that and easement from the property in question to the street will not do. I've cited case law in my position paper for you in that respect. It has to have actual frontage.

Now, this parcel does not have actual frontage. It is seperated in one point by at least 40 feet and in another place by 15 feet and even if the Village granted permission to cross that, it does not work. The landowner has to have what we call fee title, actual ownership of the frontage parcel.

MR. FRISHBERG: He has to purchase that from the Village?

MR. SWEENEY: Yes, he has to acquire that somehow. So, this has nothing to do with the prescriptive easement, this has to do with the issuance of building permits.

MR. STAHLMANN: Can I ask you a question?

MR. SWEENEY: Yes, you may.

MR. STAHLMANN: When we own property, all of us here in the Village, we don't necessarily own to

25

the asphalt line, we own to a line that normally towns reserve to themselves either if they want to put in sidewalks or there's other things they want to do. So, an asphalt may be 50 feet wide but the right-of-way may be 70 or 80 feet wide and that's how we get from our driveway to the street and when we get from our driveway to the street we are passing over Village property every morning.

MR. SWEENEY: That is generally true in your property fronts on the right-of-way. In this case this is Mr. Lewis' argue is a street by user. When a street is acquired by a village or any municipality by user it is acquired only up to the extent that it is used. It is not acquired outside of that user strip, that user strip is about 28 feet wide and that's the extent. If there is a village street that's the extent of the village street, 28 feet, it still leaves a gore there. This is not the right-of-way on a subdivision map or dedicated parcel and so forth where you have 50 feet then gutters or interior lines of 20 or so feet and then you have the paved street itself, the paved travel way. This is a street - if Ted is correct - a street by use, and the use only extends

2 3

17

18

19 20

21

22

23

24

25

to what is the actual traveled way, and that's about 28 feet here.

MR. GABA: I am sorry - I am looking at my copy, where did the 15 feet from the pavement figure come from?

> The scale is about 15 feet. MR. SWEENEY:

MR. GABA: How did you come to scale that at about 15 feet?

MR. SWEENEY: Can you get a scale?

MR. FRISHBERG: Can I ask you does it matter how many feet, if it is 15 feet or 50 feet?

It matters to this extent. The MR. GABA: road by user extends not only to the paved or improved portion of the roadway but also to the traveled way so to speak. The traveled way extends any and includes anything that is necessary for maintenance of the roadway, it can include shoulders, it can include drainage ditches, it runs on the nature of the roadway. So, to say that McNally Street is just a paved way I don't think is correct at all, but 15 feet then it might be -- you know, you would have to look into what's actually on that land and decide what is included within -purported in any way by the user.

19

20 21

22

23

24

25

MR. SWEENEY: Ted, what is that scale at?

MR. LEWIS: Ten.

MR. SWEENEY: Ten feet, okay. So, there is that separation. I disagree with Steve Gaba. a street is taken by use it is taken only as to its traveled way and there's a Court of Appeals case on that and I believe I cited that in my materials as well. If it is taken by dedication that is a whole different story, then you have sidewalks and strips and things of that nature that are usually accessory of the streets, but that is not the case here if Ted Lewis' theory is correct.

MR. FRISHBERG: So, the only portion of the street that can be taken by use is the concrete portion?

MR. SWEENEY: That's correct.

MR. FRISHBERG: Because that is the only thing, under your theory, that anybody can possibly go up and down, they are not going to go on the dirt part and the Village is not maintaining the dirt part?

MR. SWEENEY: That's correct. There are curbs on the street which help define that user way, that's very well defined with the curbs.

So, that is another reason that I feel the issuance of the building permit fails, those are the three legal reasons that I think the building permit fails. Then there are policy issues that are at stake which I tried to outline in my position paper.

The first is that the street has historically been a one-way street in. If this house is built how in God's name are the people going to get out to Murray Avenue if it is a one-way street in?

MR. STAHLMANN: How does the neighbor in the other street do it because the neighbor across the street has been doing it for sixteen years.

MR. STROBL: There's an arrow right down in the middle of the street, I went up there today. When I went up to McNally Street there's an arrow right in the middle of the street when I made a left-hand turn onto right where the new house is supposed to go, yellow line right in the middle of the road.

MR. SWEENEY: If you get into the parking lot you see "Do Not Enter" which validates what I tried to point out in my position paper that historically that whole street has been an inbound street.

- PROCEEDINGS -

MR. STAHLMANN: The "Do Not Enter" sign is in the parking lot of the school.

MR. SWEENEY: Yeah, for the street.

MR. STAHLMANN: I understand that. Do the people who live across the street and their only access is what you call New McNally Street, do they make a left turn and go out of their house in the morning or do they "trespass" through the school every day?

MR. SWEENEY: The only answer that could be for this proposed house if that's a one-way street - and a one-way street by use - is that they would have to make a left turn into the parking lot and they have no right to go across the parking lot.

MR. FRISHBERG: So then they are landlocked?

MR. STAHLMANN: So, they are landlocked too,
should we shut them down?

MR. SWEENEY: I am talking about this proposed house, how do they get out if it is a one-way street?

MR. FRISHBERG: The Village is entitled to make it a two-way street, right?

MR. SWEENEY: They are. If they go through the process of declaring this a street after a

- PROCEEDINGS -

public hearing, yes, they can make it a two-way

MR. STROBL: What is the line in the middle of

MR. SWEENEY: I have no idea where that came

MR. STROBL: It is on the map in 2012.

MR. SWEENEY: There's no record of that in

MR. STROBL: This is from November 20, 2012 and I went up there today and there's a line right in the middle of the road when you make the left-hand turn, yellow line going up that road.

MR. SWEENEY: Up to the driveway.

MR. STROBL: Right up that road when you make

MR. SWEENEY: Which seems to say that it is a two-way street up to the driveway instead of a

MR STROBL: I agree with you.

MR. SWEENEY: And there's not an inkling of anything in Village records that indicates that is a two-way street or half of the street or a quarter of the street or any of the street. All of the

- PROCEEDINGS -

Village records that I have been able to touch base on says it is a one-way street inbound.

MR. FRISHBERG: If a street is not labeled is it by default a two-way street?

MR. SWEENEY: I have no idea. It has been labeled, there was a one-way sign up on that street and that is gone now.

MR. FRISHBERG: I think that was a sign, I think, put up by the intermediate school, right?

MR. SWEENEY: No, I am not talking about that. There was a one-way street sign years ago at the intersection of Murray, one-way inbound street, it is gone, I don't know what happened to it.

MS. HOLLANDER: It disappeared in the middle of the night.

MR. SWEENEY: So, historically that has been a one-way street. That presents a problem for the new house because if it is a one-way street the only way he can get out is go across the parking lot and if he does not have rights - which he does not - how is he going to get to where he has to go? And the other bigger issue is if that street is declared to be open to the public in a public way that means anybody can use it, all of Harness

Estates can use it and come through and try to go through north to Scotchtown. That can happen in the middle of the day, it can happen at school bus time, it can happen any time. That's confusion, confusion at its worst.

> MR. FRISHBERG: They would have to be going through the middle school, wouldn't they?

MR. SWEENEY: Yeah, they would have to go right through the middle of it through the parking lot.

First of all, there does not MR. STAHLMANN: seem to be anything to stop them now because you have a person living on New McNally Street that somehow is going to work every day and they are not being ticketed for whatever it is they do.

MR. SWEENEY: That is not my responsibility and it is not your responsibility either.

MR. STAHLMANN: I understand that, but all I am trying to say is we already have a situation where this street is being used and access is being gained --

MR. SWEENEY: By one person, maybe illegally, maybe.

So, is it a burden on the MR. STAHLMANN:

23 24

- PROCEEDINGS -

neighborhood if one other person uses the streets?

MR. SWEENEY: What about all of Harness Estates?

MR. STAHLMANN: I am not talking about anybody else.

MR. SWEENEY: But if it is a public street it would be.

MR. FRISHBERG: I don't understand.

MR. SWEENEY: If this is a public street anybody can use it.

MR. STAHLMANN: I would argue anybody uses it now.

MR. SWEENEY: You would be surprised to find anybody except the individual person, the Farley person and the school people and maybe you.

MR. STAHLMANN: And maybe me, okay.

MR. SWEENEY: If it becomes a public street it is truly open to the general public and anyone and everyone from everywhere, be at Harness Estates, be at Goshen, be at Monroe or be at Pennsylvania can use it. I don't think that's a good idea, that's a policy issue and I think that is something you should take into consideration. Let me sum up, I've been up here a long time.

If Mr. Noscowski wants to use this street as a support for this building permit he should do what the law says, go to the Village Board, come to this room before the Village Board and say 'make this a village street', and that is a deliberative political process. That involves the people who live along the street, the people in the village, and the Village Board will listen as to whether it should be a village street or whether it shouldn't be a village street and take into consideration all of those policy issues I just talked about and if the Village Board after that public hearing says it is a village street then there is -- if he can get title to the intervening area he can build his house, but short of that he can't and should not and I am telling you that that is the process and this building permit really should be vacated. Thank you.

MR. STAHLMANN: Thank you very much. Thank you, sir. Do I have anyone for C.H. here?

MR. HOOVER: My name is Gregory Hoover, I am an attorney and I represent C.H. and John Noscowski. I live in Warwick and I have used McNally Street a hundred times. I go to the

3

4

5

6

7

- PROCEEDINGS -

courthouse here all the time, I know people up there. Sometimes I go out McNally because there's too much traffic coming up Murray. I haven't heard anything tonight about anybody doing any kind of study as to who uses McNally Street, there's just a bold assertion that the only people who use it are those going to the school. So, whether there is public use or not, I don't know. I know I use it, you use it, I know a lot of people who use it. So, 11 I don't know, until there's a study done if we can actually say whether it is just the abutting landowners that use it.

There is a double yellow line up McNally Street. There are no one-way signs anywhere. If there was a sign there I don't know anything about it and I have no idea how long ago it disappeared but it has never been replaced and if there was one sign there how does that tell anybody up the road that it is a one-way. There should've been at least four signs, two at each end, there shouldn't be a double yellow line there, this road is used going both ways by a lot of people.

I would like to back up to the decision of the Court back in 2000. Mr. Sweeney would have you

- PROCEEDINGS -

believe for some reason that the Court said McNally Street is not a road, is not a public street, is not a village street. The Court was never asked to address that question. The only thing the Court was asked to address back in 2000 was did the Village Board do the proper thing when they brought this before the Board and declared it a village street, they said that procedure was wrong.

McNally Street had been used for fifteen years before that at least and has been used not for ten years since, but for thirteen.

The Court was never asked to decide is McNally Street a street, it was only asked to describe did the Village do the right thing at that time, and they said, no, they didn't. That left open the question whether or not McNally Street was a street. It could've acquired the use by prescription for the fifteen years prior to that lawsuit ever being brought and for the thirteen since but it was never asked that question. So, I don't know why anybody was saying that the Court decided McNally Street is not a street.

MR. FRISHBERG: You don't think that decision is binding on us though?

- PROCEEDINGS -

MR. HOOVER: No, I don't at all. It is binding on you for the fact that the decision that the Village Board made is now a void, but that's not binding on the question as to whether or not McNally Street is a street because they were never asked to address that question. Whoever brought the lawsuit never thought that that was a question the Court should answer.

MR. FRISHBERG: The implication is if they determined that the village didn't follow the

MR. FRISHBERG: The implication is if they determined that the village didn't follow the correct process to make it a street, by implication it is not a street?

MR. HOOVER: No, by implication it is not a street because of that reason. It could still be a street because of the public use but they were never asked the question is it a street or not for any reason.

MR. FRISHBERG: But couldn't they have?

MR. HOOVER: The attorney that brought the lawsuit certainly could've.

MR. FRISHBERG: The reason I ask that because is the Village now collaterally estopped for making that argument since they could've made it then, if what you say is true?

25

MR. HOOVER: Are they collaterally estopped for making what argument?

MR. FRISHBERG: They missed their opportunity to make that argument before Judge Lang and they didn't make that argument.

MR. HOOVER: They were responding to a lawsuit. The only question being brought up in that lawsuit was were the procedures correctly followed, they responded to that. The question was never presented to them or to the court - is McNally Street a street.

MR. FRISHBERG: All right.

MR. HOOVER: The only question presented was was the procedure properly followed, and they decided, no, it wasn't. That does not make McNally Street not a street, it just means it was not a street for that treason, it could've been a street for any other reason.

MR. FRISHBERG: Since we are talking about prescriptive easement can you address Mr. Sweeney's argument that you can't have a prescriptive easement unless the use of adversity, owner of the adversive argument that he has made.

MR. HOOVER: I don't believe the statute talks

- PROCEEDINGS -

in those terms. The statute says if it has been used as a street by the public for more than ten years it is a street. He's bringing in that it must comply with prescriptive easement to do that. The statute does not say that, the statute does not talk about adverse possession which can't be adverse to yourself, it only says if there's a street that has been used as a street for ten years it is a street.

MR. FRISHBERG: So then we should ignore the title streets by prescription?

MR. HOOVER: Certainly. The title is not in the statute.

MR. STROBL: I have a question on this.

Everyone is talking McNally Street all night, I

mean, what is everybody considering McNally Street,

where does it stop and start? Are we counting the

school parking lot? I want to see what the length

is of McNally Street we are talking, New McNally

Street. The parking lot, is that considered part

of McNally Street? Because I think it is confusing

to everybody, you know, what parts. I think

there's three parts there and --

MR. LEWIS: There are. For the record this is

- PROCEEDINGS -

Ted Lewis speaking. This is how this permit was issued and not a great scrutiny but as you can clearly see this line right here clearly shows the Village of Goshen, this line right here shows where the school starts, Goshen Central School District, so, McNally Street would end right here and the school property would take off. This clearly shows it (indicating).

MR. STAHLMANN: For the record, he's pointing at a map and he's showing us where the Village line is on the map.

MR. STROBL: So, we are considering, the Board, going through there, going through this parking lot and school to this corner is what we are considering McNally Street as we all agreed on (indicating)? And then apart from that turn is what we are considering some people call New McNally Street, basically the curb part that we are saying coming off of, you know, making the left-hand turn up on in? We are not arguing that the school parking lot is a road? Because I look at that --

MR. STAHLMANN: No, we are just looking at Murray Street to the edge of the border of that

4

property line I think is what it is. Is that a fair statement?

MR. HOOVER: It is a fair statement but then if you name McNally Street a street and people drive up there where do they go when they get to that property line? They continue right on It is delineated as a through area of the through. lot right there, parking to the left, parking to the right and people drive through. I would think that what you would do is put up a 10 mile an hour sign to go through that part of the property. It is not private property anymore. Under the Vehicle and Traffic Law any parking lot that holds more than five cars is a public road. You can be arrested for DWI, be arrested for speeding, failure to stop at a stop sign. Those are all public roads once they have more than five cars there. Sure, the school owned it, but it is deemed public because it has more space for more than five cars.

So, certainly people are going to drive through there, people have been driving through there for 25 years, 28 years, and they are going to continue. That's neither here nor there as far as whether McNally Street is a street or not, not

whether it should be, whether it is.

MR. STROBL: Yeah, that's what I am asking.

MR. HOOVER: That's right. I think it is. If they have been used for 28 years as a street, it is a street. Mr. Sweeney talks about a gore. Again, I bought my property a long time ago, I own out to the middle of the road, it does not happen anymore. Today you own up to the edge of the road. The edge of the road according to this map isn't delineated. What is shown on here is the edge of the pavement, it does not mean that is the edge of the roadway. This is just a survey done showing what's there, nobody who did this survey researched where the property line is for that road.

MR. FRISHBERG: I understand with his argument that when you acquire a property by use you can only acquire that portion that you had maintained and the Village did not maintain that property.

MR. HOOVER: That's nonsensical. If it is a used road, it is a used road and a road that encompasses a meaning and that meaning includes some place for people to walk, it includes some place for drainage ditches to be. I mean, it is nonsensical to think that any road no matter how it

becomes a road is merely limited from the edge of pavement to the edge of pavement. It does not make sense. If this is a road it is a road same as all other roads and I think you have to use the plain language and the plain meaning of the word road to describe this. I think Mr. Sweeny is really trying to narrow it down to something that cannot really be narrowed.

MR. FRISHBERG: Do you know if this statute - and I was flipping through the notes I haven't seen anything - is viewed broadly, narrowly, some other way?

MR. HOOVER: No, I don't know and I am not going to say --

MR. FRISHBERG: I don't know the answer either I am trying to figure it out.

MR. HOOVER: I don't know much more than you do.

MR. STAHLMANN: Can I ask you this question?

One of the things you are asking us to consider is that through the use over the years this has become a road. So, what do we have in the testimony regarding maintenance, snow plowing, paving, are there those things that have happened on the street

′

5

through the years?

MR. HOOVER: Absolutely. If you just take a look at the road it has been there how long? It has been there for 25 years. It sure looks a hell of a lot better than Sleepy Valley Road that I live on. Somebody has been maintaining it, the Village says they have. They've been plowing it, the double yellow line in the middle that's fairly new, that's not warn and those buses quite a few of them go up and down there every day and I am fairly certain they don't maintain a distance from that line.

MR. FRISHBERG: So, for us to decide - I guess in your client's favor - do we need to hear sworn testimony as to who is maintaining it and what they are doing and who has been using it?

MR. HOOVER: I would think so. But who has been using it, how are we going to determine that? I don't think the burden is on us to prove that, I think the burden is on the objectives to prove that nobody is using it but the abutting landowners which they assert, and I don't think that is anywheres near true.

MR. FRISHBERG: So, your claim is the burden

isn't on your client to say that the Village has been maintaining it and other people have been using it, it is theirs to show the negative?

MR. HOOVER: They are claiming that nobody but the school uses it, let them prove it.

MR. FRISHBERG: Right. They are showing negative?

MR. HOOVER: I don't see that, I don't see that at all. I started using that street -- my grandson is 17, I guess he was in the intermediate school eight years ago, I think that was the first time I discovered McNally Street. Well, once discovered I used it a number of times since and he's now in Washingtonville. So, certainly I am not a permissive user of that street, I use it because I am part of the public and it is a street. There's no sign anywhere where it says it is not. Why would anybody wind up at that intersection feel obligated to not go up that road?

MR. FRISHBERG: Who paved that road, who put the tar down?

MR. HOOVER: I have been told the Village did.

MR. FRISHBERG: Can you confirm that?

MR. GABA: I believe Steve did in his research

- PROCEEDINGS -

in the Department of Transportation in the highlighted part in the DPW, it is right in the Building Inspector's decision.

MR. FRISHBERG: So, the Village created that street by putting tar down. Who snowplows it, the Village?

MR. HOOVER: The Village does.

Now, as far as the argument about Harness
Estates, if you are going to come out of Harness
Estates and come straight down Murray to Scotchtown
it makes a lot more sense than to even think of
making a right and going up that hill and through
the parking lot and then where do you wind up, you
wind up on another street with a number of stop
signs to get to Scotchtown.

MR. FRISHBERG: Do we need a traffic study before we can make a decision?

MR. HOOVER: No. Why? I mean, we are not proposing that we are doing something against the flow of traffic, they are. They are proposing that we are doing something that nobody else does, only the school and its parents and teachers and invitees use that road. I think that's nonsense. Anything else?

- PROCEEDINGS -

MR. STAHLMANN: No, sir.

MR. HOOVER: Thank you.

MR. SWEENEY: Can I have one minute quickly? The law is clear that the burden of proving who uses the street and proving that it has been used for ten years or more by general public is on the one who wants it to be and that would be Mr. Noscowski, not us.

MR. FRISHBERG: What would they need to do?

MR. SWEENEY: I belive there has to be some testimony from some first-hand person that it has been used by the general public.

MR. FRISHBERG: So, Mike Nuzzolese should get here and testify? I mean, the affidavits -- I am looking at a case -- actually this Marchand vs. New York State it says affidavits --

MR. SWEENEY: There's no affidavits here.

MR. STROBL: Isn't it a school for the general public? I mean, the general public pays school taxes. I mean, we are sending kids to school, isn't that a general public school?

MR. SWEENEY: School buses use that road, you never seen a school bus use a private drive for a private road?

- PROCEEDINGS -

MR. STAHLMANN: The point is that the record should have something in it that gives us a basis, a basis for saying that, in deed, there's been maintenance here, there's been paving here, someone has been painting lines in the road, who did these things. I understand what you are saying.

MR. FRISHBERG: And I think we were entitled to accept hearsay on that issue but we should have something.

MR. SWEENEY: The law is clear and I don't want to repeat myself but the law is very clear. When a street is taken by use it is taken from curb to curb or inch to pavement and inch to pavement, there's nothing else outside.

MR. GABA: I disagree very strongly with Mr. Sweeney on that. It is the first time we ever did disagree, Jim. But what I was going to say is that Mr. Sweeney is correct if the road was being taken by user and this was a court proceeding where municipality was asserting that for this instance then certainly the burden of proof would be on the municipality, that's not the case here. What you have here is an appeal of the determination by the Building Inspector. The Building Inspector has

- PROCEEDINGS -

investigated the fact and made the determination, now the person challenging that determination has to carry the burden of proof to determine that his decision was irrational, arbitrary and capricious and otherwise should be set aside.

MR. FRISHBERG: We went through this process in an earlier decision with the building permit that was issued regarding Delanceys and I thought the law was we get to stand in the shoes of the Building Inspector and make that decision as though we were standing in his shoes.

MR. GABA: I have not seen any cases --

MR. FRISHBERG: That's what I understood the law to be, it is almost like a de novo decision that it is not whether we act arbitrary and capricious, it is whether if we were the Building Inspector would we have made that same decision.

MR. SWEENEY: That is right in the text of the statute.

MR. STAHLMANN: Let me do this. We would like to hear from you, folks. Does anyone want to make a comment and want to have anything to say, anybody from the neighborhood?

MS. HOLLANDER: Lisa Hollander, 187 Murray

Avenue. I don't understand when our file was tagged 'do not issue a building permit' why we were not alerted beforehand and the building permit was issued, the land behind our house was clear-cut, there are no trees there, he cleared the property right up to our property line. Mr. Noscowski took wood chips and it was almost out of vindictiveness maybe because he wasn't able to build ten years ago and a pile of wood chips were put in our backyard that were 12 feet high. I mean, a huge pile of wood chips. MR. STAHLMANN: When you say in your backyard

MS. HOLLANDER: In our property in our backyard. So, what I don't understand is why the building permit was even issued when our file was tagged but our lawyer told us that don't worry, they will not be building, that however the road was determined or whatever the results were this file was tagged 'do not issue a building permit.' So, why Mr. Lewis went ahead and issued it is a confusion to me that we were not alerted and the adverse possession or whatever that was, it was just kind of like we were plowed and he was allowed

to clear-cut the property without us being notified to even object.

MR. FRISHBERG: So, the issue you are raising is whether Mr. Lewis had an obligation to notify a continuous property owner to issue a building permit?

MS. HOLLANDER: He has an obligation when the file -- I feel he has an obligation when the file was tagged, that is what we were told. In 2001 the file was tagged 'do not ever issue a building permit on this property.' So, my feeling is as a homeowner abutting this property - and we went through this whole thing ten years ago - I felt that if the file is tagged that way then why weren't the homeowners of the abutting property notified before the building permit was issued and as a result of the building permit being issued we now have a clear-cut piece of property behind our house.

MR. FRISHBERG: I am going to ask Mr. Gaba did Ted have an obligation to notify the continuous property owner?

MR. GABA: I don't think there was anything in the code about issuing building permits and

notifying an abutting property owner.

MR. STAHLMANN: Lisa, do you mind if I ask you a question and believe me, I do it with the upmost respect. I think I am the only board member that was here thirteen years ago when we did this and I asked the question then and it is more philosophical - you have a two acre lot, it is bigger than anybody else's lot in the neighborhood and he's putting one house on it and that neighborhood has fought him vigorously now for fifteen years, so, as a fellow neighbor tell me, what's going on, what is the objection to him putting a house on the property because it has to be more than the legal technicalities that I am hearing. What does the neighborhood not want about a house on that property? Do you understand what I am saying? And if you don't feel comfortable answering I don't want to put you on the spot.

MS. HOLLANDER: I feel part of it is that he does not respect the other property owners. I believe it was you that asked him did you consider putting a road on the other side of the property and I believe Mr. Noscowski said no, and I believe you asked him would you consider having a meeting

- PROCEEDINGS -

with your neighbors and he said no and he clear-cut the property. As soon as he got his building permit he came in with backhoes, and also Mr.

Noscowski parked a backhoe for the last month - this has been on a stay or whatever you call it - he parked a backhoe right abutting up our property. It is not nice, you don't make nice with your neighbors when you do things like this.

MR. STAHLMANN: I understand that. I guess what I am trying to ask is when we live in a village do we have the expectation that our neighbor will never develop the property next door to us? I live on Winston Drive and I am right across the street from all that vacant land that runs along North Church Street, do I have an expectation that no one will ever put a house there?

MR. SWEENEY: Can I answer that? The answer is, no, you don't have expectation at all but you do have an expectation that the person who owns the property is going to follow the law.

MR. STAHLMANN: Okay. Thank you.

MR. SHERWIN: I am Jeffery Sherwin, I am the appellant. As you may know, Mike Donnelly

represented us thirteen years ago and I think you looked at his petition following the Article 78 proceeding you will see that every one of these arguments was made and decided and I think if the Board reads it and your attorney reads it you will see that basically after considering all of the arguments the Supreme Court found that this is not a public street and all of these arguments were made. The questions were all asked, I think there's five or six points in here and you can look at the petition, you can look at the decision of the Court.

I think there's two issues here. One is, you know, you ask kind of a, I think, a personal issue like what are we opposed to it and, yes --

MR. STAHLMANN: Again, I do it with respect, I am not being a wise guy.

MR. SHERWIN: No, I understand that and I don't think that has really anything to do with it but I will answer it. I think we have been involved in this since, I guess, 2001.

MR. STAHLMANN: I think it was earlier than that.

MR. SHERWIN: Yeah, maybe, granted otherwise.

What I found is the following: Apparently Mr. Noscowski bought this property for \$60,000 in 2001, the property was landlocked, he didn't use any due diligence to determine whether it was landlocked or not but that was the way it went and following that we had a number of board meetings which I attended and in my opinion every time an offer of conciliation was met through Mr. Noscowski, we would meet with the neighbors and talk with him if he would work out a buffer zone or anything like that and he declined. I think you asked that question yourself, I think the Planning Board Chairman asked him about it. Originally it was a five lot subdivision, then it was four and two and he's already told one of our neighbors that he intends to build a second house there if he can get this one through, so, I think that's what his intent is. So, there's a little more to the story each time but really he has not acted - and I hate to say it out loud - as a good neighbor. He went once the building permit was issued he came right through and took out every tree right into our backyard. You are welcome to come into our backyard, 187 Murray Avenue, you will see his

excavator sitting there, there was a second one sitting there a few days ago. You will see he's took down every possible tree, every live living thing down. You don't do that with neighbors, you don't treat neighbors like that. You would not be happy, you would not be happy, you would not be happy or you. So, there's been a total lack of respect for the neighbors in the community in my opinion and that's talking to you and has nothing to do with legal issues. A little more to it - he then took a huge pile of wood chips at least six feet high and deposited it on our property over the fence because Ted asked him to put up the silt fence and I called Ted and Ted said you mean it is on the downhill side of that fence, I said, yeah, it is on our property. He had to go out there and ask him to move it.

This is not the way you get cooperation from neighbors. So, there's two things here I would Number one, there are legal issues like to say. that I feel are determinative that demonstrate that the building permit was not properly issued, we are prepared to go forward with this and let the courts decide, if necessary. I think Jim Sweeney who is

very knowledgeable about this, I think Mike Donnelly who was very knowledgeable about this before us, each of them feel strongly that the building permit should not be issued, there's no legal basis that this is a public street. I think if you folks believe that the school property is a public street up there I think you are making a mistake. That's owned by the school street. The school does not want people driving through that property and you can talk to the superintendent, you can talk to the principal, I've done that. They do not want to give a license or an easement to drive through that property. The street has always been a one-way street, there was a one-way street sign when I moved there in 1983. there up, I would say, up until three or four years ago when during the night it disappeared, how it disappeared - I don't know.

These double yellow lines we are talking about they don't go too far, they kind of go up to where that driveway is for the far house.

MR. STAHLMANN: So, how does the neighbor go to work every day?

MR. SHERWIN: I have no idea, I have never

- PROCEEDINGS -

seen that neighbor leave. I honestly have no idea, you would have to ask Mr. Farley or Mrs. Farley, I don't know. But they don't go up to the area where Mr. Noscowski's intent of getting access, they don't go there.

MR. STAHLMANN: They go up and make a left and they go down to Murray Street.

MR. SHERWIN: Do they?

MR. STAHLMANN: Yes.

MR. SHERWIN: You know better than I do. I've never seen them leave that house and I've lived there since 1983. And if you look at the minutes - I think Mr. Sweeney submitted those of the Village Board from 2001 and I have a copy of them if you need a copy of them - Mal Stewart as trustee when he made the motion or the resolution to pass or declare the village street which was overturned by the Supreme Court. He said, I also want to reaffirm this is a one-way street going -- one-way street or one-way driveway going up to the school, so, it has always been that way. I think without the permission of the school to go through their property - which they don't want to do, they don't want to open up the flood gates to the public, the

Harness Estates and to other people. There really is no access to that property and I believe these arguments who have been made by Mr. Sweeney are valid and will stand up in the courts. Thank you.

MR. STAHLMANN: Gentleman in the back, tell us who you are?

MR. NOSCOWSKI: John Noscowski, I am the owner of the property in question.

where they say I would need permission from the school, my deed gives me the right-of-way from Murray Avenue to the property, so, that permission is in the deeded land. Secondly, I didn't go on anybody's property. I kept my silt fence 25 feet off of the property, they are using lawn which is encroaching probably 15 to 20 feet on my property. I didn't clear-cut the trees to their property, I am off of their property. I've been keeping the site neat, I went there out of courtesy to the Building Inspector to move a pile of chips which was 30 feet off of the property line on my land.

Nobody ever approached me in the history of this property - and it is for sale, they could've bought it - about design, house location, I never

applied for a building permit, I never applied for five homes there. Previously in the '80s which Mr. Sherwin's office was representing somebody and in his paperwork which I have states that that's a street while he was trying to get a five lot subdivision for that previous person out of Mr. Sherwin's office. The two lot subdivision that I proposed, the driveways were on the school side of that property which I was in for a variance, not a building permit application.

MR. STAHLMANN: That is right, I remember that.

MR. NOSCOWSKI: So, there is a lot of mistruths stated against me here this evening and nobody has approached me ever and talked about this in a gentleman-like manner.

MR. STAHLMANN: I remember from our minutes way back when, John, something about there was an indication that the school was going to consider making you an offer? Just my recollection from thirteen years ago.

MR. NOSCOWSKI: Correct. And they went to vote and lost by three votes.

MR. STAHLMANN: So, you did have discussions

with the school?

MR. NOSCOWSKI: With the school and they were the only ones that ever had discussions with me on that property.

MR. LOBREGLIO: My name is Len Lobreglio and I live at 183 Murray. Since this whole hearing is about when the building permit was properly issued and a question was asked before whether the Building Inspector has to notify anybody about the building permit, I just want to take that one step back. If something is tagged 'do not issue a building permit', I know what that means to me but what does that mean legally in terms of issuing a building permit?

MR. STAHLMANN: I don't know. First of all, Ted, was there some indicator on the file?

MR. LEWIS: No. I issued it clearly on the survey that I showed you tonight. It was done by a professional land surveyor and it clearly shows the Village of Goshen owns the property which I issued that permit on. It is as simple as that.

MR. STAHLMANN: I've never seen something tagged.

MR. GABA: I've seen tags as reminders or

flags just to alert a Building Inspector but I am not aware of anything saying you can't issue a building permit for this property. It might be, you know, it has some easement over it or it got some issue as far as size or something like that that just wants to alert the Building Inspector to indicate when someone comes in or something like that but to not issue a building permit I have not heard of.

MR. STAHLMANN: I don't know if that answers your question or not but I am trying to get to the bottom of it.

MS. LOBREGLIO: I am Carole LoBreglio, 183
Murray Avenue. I am also an employee of Goshen
Central School. Part of my responsibilities is to
do bus duty and bus duty occurs from quarter to 3
to 3:15, basically that's when the buses are
arriving. When school buses come up to this New
McNally - what we call a driveway - they take up
the entire width of this road. Sometimes those
buses are sitting there waiting for other buses
behind them, ten minutes, twelve minutes, fifteen
minutes. I see this as a safety issue for the
homeowner who might have a family, a brand new

- PROCEEDINGS -

baby, and need to get out of their driveway to get to the hospital. How is that person going to get out when the buses are lined twice a day for upwards of fifteen, twenty minutes in the beginning of school, at the end of school, sometimes dismissal takes forty minutes because children don't know how to get on buses and schedules are off. So, there was mention of a traffic study, as a taxpayer, as a mother, as a teacher, I highly recommend looking into that because it is not just about what the property owner wants to do, it is about our new neighbor and what their situation might be. Thank you very much.

MR. STAHLMANN: Have there been any incidents with the neighbor on the other side of the street that we know of?

MS. LOBREGLIO: I don't know.

MR. HOOVER: Just curious how an 8 foot bus can take up all of 28 feet of pavement. By law they are no more than 8 feet wide, that leaves 20 feet. If they are taking up the whole pavement then somebody is all over the road and does not know how to drive a bus.

MR. FRISHBERG: That road is 28 feet wide?

- PROCEEDINGS -

MR. HOOVER: That's what Mr. Sweeney says.

MR SWEENEY: One last comment. Mr. Noscowski mentioned that his deed has some indication of some type of right from his property to the road, it does not. The deed is in front of you, it is Exhibit No. 3. You will look at it rather carefully and simply, it does not even mention a road as a boundary, it is completely the void of any mention of a right-of-way or a road.

MR. FRISHBERG: Is there a survey that went along?

MR. SWEENEY: The survey is on the application that Mr. Lewis referred to, it is a diagram.

MR. FRISHBERG: Did you compare the survey with the description?

MR. LEWIS: I strictly looked at the survey.

MR. FRISHBERG: So, you didn't compare whether the survey purports to the description in the deed?

MR. LEWIS: The survey clearly indicates the meets and balance of the entire property.

MR. FRISHBERG: I understand. But, I guess, what I am trying to figure out, Mr. Noscowski claims that he owns that the portion that Mr. Sweeney called the gore and --

MR. LEWIS: He's calling it a gore parcel, I am just calling it it is the way the radius is on the street or the geometric configuration the way the lot is laid out.

MR. FRISHBERG: I guess there's a dispute that Mr. Noscowski owns that portion or not, he says he owns it, Mr. Sweeney says he doesn't, can you make a determination whether he owns that?

MR. NOSCOWSKI: I didn't state that I owned it.

MR. FRISHBERG: I am sorry, then I misunderstood you, I apologize.

MR. NOSCOWSKI: The question came about where they said if the street became a street by use it is only that blacktop portion, so, the portion from the blacktop area to my property line I would need permission from the school to go across it. My deed gives me a right-of-way from Murray Avenue to my property. It is in my Title Insurance policy.

MR. SWEENEY: It is not in the deed.

MR. FRISHBERG: I am looking at your deed and I am just looking for the word easement or something and I am not seeing it, it is not there, so, I am just baffled as to why I don't see it in

this. But maybe I am short for it, what do I know, I don't have your Title Insurance Policy in front of me.

MR. HOOVER: Mr. Sherwin vividly objected before when somebody said there was a motion by his firm from a prior owner and I have a copy here of a letter from 1986 from MacVane, Lewis, Sherwin, McDermott and Rosengreen in which it says, "There's one matter that I would like to call to your attention involving the roadway leading to the Goshen Intermediate School." This letter is from MacVane, Lewis on behalf of their client and it is signed by Peter Strefis, may he rest in peace. "The wider portion of what some people regard as a driveway is actually part of Murray Avenue extension and is a village street. At the point where the roadway narrows it ceases to be a village street and is part of the property of the school district." This was asserted by Mr. Sherwin's firm back in 1986. I would like to give it to you to have as a copy.

MR. FRISHBERG: Is he bound by what is -MR. HOOVER: No, but he was just objecting
very strongly that that was never done, nobody ever

said that. I would like you to just have it in your file.

MR. SWEENEY: That was considered by the Court in Judge Lang's 2000 decision.

MR. FRISHBERG: I do have a question, Mr. Sweeney and Mr. Hoover, because Mr. Sherwin brought up this petition that was submitted, can you tell me -- what I heard you say is that a lot of the arguments that we are reviewing today was viewed then.

MR. SWEENEY: Every one of them.

MR. FRISHBERG: To what extent are we bound to that petition be part of our decision making process, if at all?

MR. SWEENEY: Should the decision be part of your decision making process?

MR. FRISHBERG: No, to the extent that these arguments were made in the petition, to what extent should that be part of our decision making process?

MR. SWEENEY: The Article 78 petition?

MR. FRISHBERG: Yeah.

MR. SWEENEY: All of them should be, I think it is a collateral-stoppled issue all across the board.

MR. SHERWIN: Can I just clarify something? This letter that has been talked about which was an exhibit in the prior proceeding was a letter written by Peter Strefis who I believe at that point - I didn't have personal knowledge of it but I believe he was the Planning Board attorney at that point. Am I correct, Jim?

MR. SWEENEY: That is correct.

MR. SHERWIN: He was the Planning Board attorney for the Village of Goshen, he wasn't representing anybody for the firm for the subdivision or anything like that, he wrote the letter and he was commenting about a submission made by Mr. Carr on behalf of Tradewind Developers. Our firm did not represent anybody on a subdivision property, it was totally a misstatement.

The other thing is Mr. Noscowski said he never proposed a five lot subdivision for this parcel, I have minutes of those meetings where he had come in and asked for the five lot subdivision lot and you may remember that.

I remember the application of MR. STAHLMANN: the --

MR. SHERWIN: Yeah, then it went from five to

24

19

20

21

22

23

3

- PROCEEDINGS -

four to three to two and then one and then maybe another one after this.

MR. STAHLMANN: So, could that also then be an argument that he's been a little conciliatory and that he is entitled to build a house on a two acre lot?

MR. SHERWIN: I think if he's legally entitled to build there, he should build there; if he is not legally entitled to build there, he should not be permitted to build there. That's my position. Thank you, sir.

MR. STAHLMANN: Anybody else? Steve, is there anything you want to say, want to tell us about?

MR. GABA: I am here to serve the Board, if you have any questions for me I will be happy to answer them.

MR. STAHLMANN: Here's what I want to do. I want to go around and get a feel for where everybody is. Gar?

MR. CLARK: Mr. Sweeney is doing a good job of presenting this case on the issuance of this but how can this Board supersede the Village Law which is 6-626 stating that is a Village street. How would we supersede it?

MR. STROBL: I am still a little bit troubled with what goes through the school. I mean, I kind of want to know what we really honestly consider McNally Street. Does it go up to like where the DecHale's house, does it become the school parking lot and then are we talking New McNally Street? the school is a road how wide should that be in the parking lot, shouldn't that be marked? And then I will be honest, I have been going back and forth on this thing, I have printed stuff, I've been online, I have been on the County site, my wife thinks I am totally nuts and she's probably right. But I think my thing on it is it has been sitting here for ten or thirteen years. If I am going to say honestly, I just don't know why it just didn't go in front of the Village Court and they just made it a street and that is what they should have done. I have a hard time going ten or twelve years later on a case that we were sued on and just saying, okay, it is ours now, when we've had a case before and I would think if I am on the Village Board I think I would be a member and instead of being sued I think I would have an open meeting, let everybody speak and then be done, why be sued? To me it does not make

any sense. So, I mean, I would like to almost recommend it goes that way, I know we can't do that but I just don't see why we are going to the direction we are going in. I don't see why we got involved. I think it should really go to the Board and they should have an open hearing and do this and why do we want to spend thousands of dollars on lawyers, I mean, I am a tax payer, so, I am pissed off. I mean, that does not help you in which direction I am going in.

Honestly, if I look at that map and I look at it from an aerial view it reminds me of an access street going into the high school and that road is the same way, if you want me to be perfectly honest. How is that road any different than going to the road that goes into the high school off of Scotchtown, it is the same thing, it is the same thing and we don't call that a road. So, I am having difficulties with that, I am having difficulties with the parking lot going between McNally Street here and in some of the records I have seen it called New McNally Street. I have not seen it on the Village map, I have not seen the lanes of McNally Street on a so-called street list.

Does it go, is it divided, how long is it, don't just give me McNally Street, giving me the New York State Thruway, are we talking New York City or Buffalo? So, I haven't seen any of that stuff.

MR. HOOVER: I think the difference between this road and the access road to the high school the school district owns the whole property along that road, you have private property owners on both sides of that road. So, it is not the same as the access road to the high school.

MR. STROBL: No, but I am saying it is an access to the school and I look at this thing --

MR. HOOVER: But you have private property owners.

MR. STROBL: As I look at this as of right now it is almost like an access road to the school, that originally is what it looks like. And, yes, the gentleman has got property there but let's be truthful, buyer beware, I mean, hey, come on, buyer beware. I mean, I look at that, yeah, I want him to use this property, sure I do, I mean, he bought it why wouldn't you want him to use that property but when you are ready to buy that thing he should have gone and done a little more work. So, now to

23

24

25

me I would still like to see him do something but I think the Board should get involved. I don't really think it should be us and we are going to be right back to a lawsuit and when we are all done we are going to end up at the Village Court and Village decides if it is a road or not. It does not make any sense. If that's an answer that's my feeling.

MR. FRISHBERG: I think there's good arguments on both sides. I think, you know, section 6-626 is true, it has the word prescription in it but there's nothing in that statute that says the word prescription. In my reading, at least of this Court of Appeals case, it does not indicate that it is supposed to be a prescription. In case - I will put it in the record I guess - is called Marchand vs. New York State Department of Environmental Conservation. That wound up to be an action to acquire title and in that case the Court found that the dirt road was not a Village street because it was maintained by the owner. Now, my reading of the case is that if the property is maintained by the Village and is used by a public body and used by the public then it becomes a road if it is

continuously used for a period of ten years. But, you know, what I am hearing is that the Town became responsible, the Village is responsible for the condition of this road, that's what I understand. I don't think there's any dispute that the Village plows the road, the Village tars the road, the Village maybe even helped create the road. I wasn't quite sure listening to people but I don't think there's any dispute that DPW takes their snowplow down there and maintains it, I don't think there's any dispute that if there's a big hole in that road someone from DPW would patch it. Now, they may not do anything with the dirt portion of it but I am not that convinced.

So, just in terms of Mr. Sweeney's argument that it has to be adverse, I just don't see that in the statute and I ask the question how should the statute be interpreted, narrowly or broadly, and I am not sure the answer to that, maybe Mr. Gaba could chime in on how this statute should be interpreted because to add the word prescription to the statute to me it means adding something to the statute, at least in the cases I found. And Mr. Sweeney may very well agree and with great respect

24

25

to him, he as well as Mr. Hoover, but I just don't see it.

Going to the argument that, all right, assuming for the moment there's no easement by prescription, there is an easement -- not an easement - I am sorry. Assuming for the moment it is owned by use, the next argument is find the property does not go to the road itself, so, the road itself does not include the dirt portion of the property, I am having trouble with that too. think if there was a problem with that dirt portion of the property the Village would maintain it if there was an issue regarding that. The problem I am having is this burden of proof, I am not sure who has the burden of proof. There is this case -I will go back to the Marchand case and there is an Appellant Division portion of that case - they said that affidavits of people who maintained the Village street is enough and that Marchand case they had affidavits of, I guess, people equivalent to the DPW and things like that, but there's just been nothing here as to whether or not that dirt portion is maintained. Forget the street portion, I think everybody sees the street portion is

- PROCEEDINGS -

maintained but what about the dirt portion, but Mr. Sweeney says, well, that's not included. I can't find any cases one way or the other, Mr. Sweeney says there are cases --

MR. SWEENEY: It is in your materials, I will recite them to you.

MR. FRISHBERG: Just refer me to the footnote if you know it offhand.

MR. SWEENEY: I don't. I think it is on page 6 or 7. I will refresh your memory with it.

MR. FRISHBERG: So, I am having trouble with it. The last argument, as I understand, was the policy reasons and I am hearing -- I forgot your name, I am sorry.

MS. LOBREGLIO: Carole LoBreglio.

MR. FRISHBERG: I am hearing you loud and clear that when buses line up you are not sure how people are getting out but Mr. Hoover says, well, wait a minute, the buses are only 8 feet wide.

MR. LOBREGLIO: May I say something? I know that Mal Stewart has said years ago that it was a one-way street, I don't know if they have ever been there in the morning but they do line up and they also angle themselves in such a way that they can

- PROCEEDINGS -

get as far in as possible to that line and it does not block it. You are right, one bus by itself is not going to take up the whole thing but if there is kind of one over here and one over here and one in the middle too.

MS. LOBREGLIO: And at that point it is one-way, vehicles are only coming into the school property one way. We are not allowed to even allow cars to come through during that time period and parents are making a legal U-turn because it is a one-way affair at that point of the day and it says it is one-way, there's a sign there.

MR. FRISHBERG: No, I was there this evening, I just drove up the street I was going to pull down and turn around and it says "Do Not Enter" clear as day.

MR. HOOVER: But, again, nowhere does it say "One-way"?

MR. FRISHBERG: No, there's not an arrow where it says "One-way", you are right, but clearly when you are coming in from the intermediate school it says, "Do Not Enter."

MR. STAHLMANN: Mr. Hoover, can I ask you a question? The Village gets State funding based on

their streets?

MR. HOOVER: They also get federal funding,

the street is included in the land of --

MR. STAHLMANN: That was my question. They have to submit a list to the State of what their streets are because that's what their funding is based on?

MR. HOOVER: That's correct.

MR. STAHLMANN: So, that lists then includes

MR. HOOVER: McNally Street and they've been getting funding for it for years.

MR. STAHLMANN: Since there's also McNally
Street over there is there any way to understand as
to what that is all about?

MR. SWEENEY: Yes, there is. They get both funding. They are on what is known as State Inventory for CHIPS purposes - that's State aid from our State aid; however, the inventory is prepared by the street superintendent, the highway superintendent, Department of Public Works Chief or whatever he is - not prepared, reviewed or signed off by the Village Board. The fact that a street appears on a CHIPS Inventory does not make it a

municipal street.

MR. STAHLMANN: I was just trying to understand what the State did with it.

MR. FRISHBERG: It does say, by the way, going back to this Lang's decision, it says, "The record before the court is also the void of evidence that the alternative, the paved driveway never became Village streets through public use for village maintenance", pursuant to Village Law 6-226. "Naked use by the public is not enough, whether under the theory of dedication of prescription and must be further demonstration that the Village has continuously maintained or repaired the alleged street and let's assume control thereof during the period of time in question." This predates this Court of Appeals decision I found.

So, here's my issue as I raise it --

MR. STAHLMANN: I think I know where you are going with this.

MR. FRISHBERG: -- that back in 2003 it sounds like the Village tried to make the same argument but lacked evidence of it, now they have the same argument they are making to us that they are making before the Supreme Court. Are they barred for

making that argument before us?

MR. GABA: They are not barred from making the argument based on the ten intervening years based on the Court's decision, even if it wasn't found to be a road by user back in 2003, the intervening ten years could result in prescriptive --

MR. FRISHBERG: In other words, the relevant time period which was the date of this decision until now?

MR. GABA: As far as this proceeding is concerned, for the Court it is dates prior to the court's decision. So, if the Building Inspector had found that it was a road by user based upon facts predating that decision then perhaps there would be some collateral estoppel issue would be considered but it has been ten years since that decision, those facts which, of course, went before that Court could result in the road to becoming a village street.

MR. STAHLMANN: Is the fact that he made that determination sufficient for this Board or does this Board need to hear independent testimony as to the use or maintenance?

MR. GABA: I would have to tell you on that I

- PROCEEDINGS -

have not been around the horn on burden of proof where you have a neighboring property owner challenging the building permit. The general rule in regard to any application, ZBA or variance or filing a building permit for yourself is that you bear the burden of proof, you will have to show for use variance or et cetera that you meet the criteria. I am not familiar with any cases which say that the burden is any different when you have a neighbor challenging it. I could just be ignorant in that, it is very possible that is the case.

MR. SWEENEY: Maybe I can explain, Steve, and see if I can find some law for you. The difference is between an applicant asking for an affirmative belief coming to you and asking for a variance, and the appellant who is coming to you saying the Building Inspector error, is negative. When an affirmative belief is involved there is no question, the person seeking that variance or whatever type of affirmative belief has the burden. Someone who is coming before you and saying the man did wrong does not have the burden, he only has the burden of proving legality and that's what we tried

to do tonight.

MR. HOOVER: I've been trying cases for a long, long time. He who brings a case must prove it. In this case the appellant brought this case; therefore, the appellant has the burden. I don't care if he's trying to prove the negative or positive or whatever, if he is bringing the case before you he has to prove prima facie, he is entitled to relief, then the burden might shift to the other side to disprove it. But if you are bringing a case you better bring it all.

MR. FRISHBERG: Doesn't that require him to prove a negative? Generally when you bring a case you have to prove to something affirmative, not prove a negative.

MR. HOOVER: Generally you do, but you are still the bringer of the case; therefore, you have to bring the case before the trier of fact, that means you have the burden of proof to prove what case you are bringing.

MR. FRISHBERG: I understand. In a personal injury case you have to prove someone ran the stop sign, but I am trying to wrap my arms around --

MR. HOOVER: You can't come in and make a bald

- PROCEEDINGS -

assertion the public doesn't use the road. If you are going to make that as one of your arguments then you have to prove it - the public does not use the road. I don't know how you are going to prove it other than have somebody out there every day questioning everybody who goes through there 'what are you doing?' But if you are going to make that assertion to the Board that that is the problem then you have to prove it.

MR. SWEENEY: That's not the proof. What we are saying is that the Building Inspector made that determination that the public used the road and we are saying we don't, he has the burden of proving that they do. You stand in the shoes of the Building Inspector on these applications.

MR. FRISHBERG: That's what I thought Dave told us the last time.

MR. SWEENEY: It is right in the statute.

MR. FRISHBERG: Because we had a Building
Inspector for the case, I don't know, it was a
month ago or two months ago regarding Delanceys
where we were asked to annul the decision of the
Building Inspector to issue the building permit and
I remember being a little confused about that

- PROCEEDINGS -

myself as to where we are on this and at least that's my recollection, I don't know if it is the recollection of the Board but at least that is my recollection.

MR. SWEENEY: There is absolutely no proof here that the general public, the public at large uses this road - none.

MR. FRISHBERG: Well, actually, the lady had talked about the buses.

MR. SWEENEY: The buses are a segment of the public, they are not the whole public.

MR. FRISHBERG: Yeah, but the whole public doesn't need to use it, everyone does not need to go down that street but the fact is every day buses use that street.

MR. SWEENEY: Every day somebody, an abutter, sits in his driveway, every day, what's the difference?

MR. FRISHBERG: That is what I am trying to figure out. What is the difference between a bus using that street or every day someone picking up their kid using that street?

MR. SWEENEY: Any activity that relates to an abutter - if you read the case I cited that is in

footnote 7 or 8 - does not qualify as general public use. It has to be divorced from that, it has to be everybody.

MR. STAHLMANN: And it is your position that the only people that ever go up that street are going to the school?

MR. SWEENEY: The school or the Farley's or whatever their name is, and maybe you.

MR. FRISHBERG: So, the parent who picks up their kid from that school does not count as part of the general public?

MR. SWEENEY: No, invitee of the school. It wouldn't be that except by the invitation of the school to pick up his child.

MR. STAHLMANN: Steve, let me ask you this question - if we asked for testimony with regard to maintenance, who maintains it, who put the lines down, who laid the asphalt, who snowplows, do we have the right to ask for that?

MR. GABA: Yeah, you can subpoena information if you need to.

MR. STAHLMANN: Okay. Do we have the right to ask for a continuation of the meeting for next month with the idea that someone produce something

for us?

MR. GABA: You can hold a public hearing next

month, absolutely.

MR. DONAVON: Would it be worth while to also ask the school what their role is in the maintenance of that road because I don't know how either the school or the Village sort of knows where to stop their plows, do you know what I am saying? I think that the school might actually --

MS. LOBREGLIO: Yes, they do actually. The janitors and this dirt area is often shoveled or plowed with a snowblower with the maintenance crew at the intermediate school, and I was just curious does the snowplow go up that little piece and stop and then the school plow then come in? I am not there that early in the morning, so, I can't, but I have seen maintenance crew work on this area of what we are calling dirt. It would be worthwhile to ask.

There was also a sidewalk MR. NOSCOWSKI: installed there in the last couple of years by the Town or the Village and that is on that supposed door area in between the pavement and my property line which is probably an excess of six or seven

feet, so, there's probably almost two or three feet, that gore area.

MS. HOLLANDER: I just have a question. always thought that it was the Village's responsibility to pave and take care of roads or driveways or whatever we want to call them that lead up to our public schools. So, whether it is part of the Village or whether it is part of the school, you know, if the Village takes care of it, so what? I mean, why is that important?

MR. STAHLMANN: I think it is important.

MS. HOLLANDER: It is an accommodation, I mean, don't we have to get our school buses up to the school?

MR. STAHLMANN: I understand what you are saying.

MS. HOLLANDER: So, I would think -- I don't know why that makes a difference.

MR. STAHLMANN: Okay. Anybody else have any comments this evening? Do I have a motion here from anybody?

MR. FRISHBERG: Let me raise the issue - if the direction we think we are going is that we want to hear testimony it seems to me we have to keep

the public hearing open. I would like to hear a little bit more if it is okay. I would make a motion to keep the public hearing open to next month. I would like to do a little bit more in terms of this.

MR. STROBL: I will second that.

MR. STAHLMANN: All in favor?

MR. FRISHBERG: Aye.

MR. STROBL: Aye.

MR. CLARK: Aye.

MR. SWEENEY: I have no objection to that. I would ask for two things - you have the subpoena power to bring in the highway superintendent and I think I would exercise that to bring him in.

MR. FRISHBERG: Well, is there anybody you think we should hear from? I would ask you that and I will ask Mr. Hoover that, are there people you think we should hear from?

MR. HOOVER: Certainly the highway superintendent.

MR. SWEENEY: And I suspect the school superintendent here as well.

MR. STAHLMANN: How about Mike from the DPW?

MR. SWEENEY: And I would also ask you and I

think you have the power to direct that no activity take place until you make the determination essence in administrative stay. I think that is in the statute, I am not 100 percent sure.

MR. FRISHBERG: We have a right to issue a stay?

MR. GABA: There's an automatic stay on enforcement proceedings, I don't believe this board has the power to issue stays.

MR. SWEENEY: I think it is in the statute, let me see if I can dig it up.

MR. STAHLMANN: Anything else?

MR. SWEENEY: No.

MR. STAHLMANN: Mr. Hoover, anything else?

MR. HOOVER: No, sir.

MR. STAHLMANN: For everyone who came tonight thank you very much, thank you for your time. Our meetings are now the third Thursday of the month.

(Proceedings concluded at 9:07 p.m.)
